

Holley Performance Products – Leaves the Competition Behind

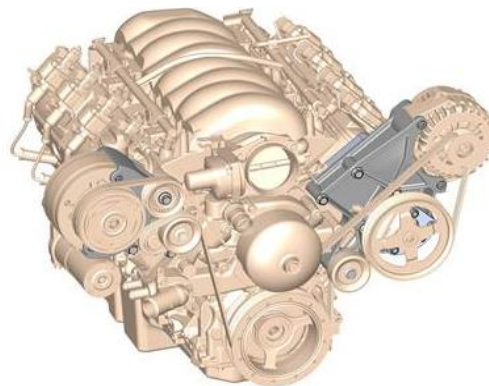

Holley Performance Products needed to stay ahead of the competition. They found the answer with SOLIDWORKS and the team at 3DVision Technologies.

What Made the Difference

"The support was great, you guys met with us several times to guide us through the options in SOLIDWORKS and helped throughout the process while we decided what we wanted to do. Sales was very supportive, I'd say 3DVision is above the bar on all aspects with their Technical Support being out the roof."

Coy Hudnall - Design and Development Engineer

Holley Performance Parts designs and manufactures fuel systems and engine dress-up products and has been the undisputed leader in fuel systems for over 100 years. To raise the bar on their competitive advantage they needed a way to minimize time to market for new parts as well as lower costs, and increase overall productivity. Holley chose [SOLIDWORKS Premium](#), [SOLIDWORKS Simulation](#) and [SOLIDWORKS Enterprise PDM](#) to reduce design time without sacrificing quality and accuracy.

The Results

- Reduced scrap by creating a perfect 3D model every time
- Optimized the desired light weight of new designs
- Increased ease of communication with manufacturing producing a high level of accuracy
- SOLIDWORKS conversion and implementation process got systems up and running quickly
