

Quality Tooling, Inc.

COMPANY

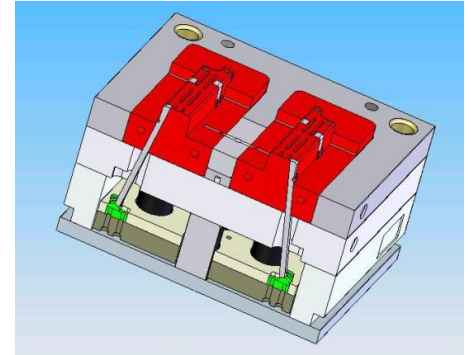

Designs and builds molds, tools and dies for some of the world's leading manufacturers.

CHALLENGE

To upgrade its design platform to a parametric CAD system in order to increase throughput, reduce design errors and improve data flexibility.

SOLIDWORKS BENEFITS

- Reduced design cycles by 50%.
- Eliminated more than 90% of design errors.
- Added mold design and draft analysis capabilities.
- Improved handling of CAD data.

“ With SolidWorks software and the partner products, we now have mold development capabilities that we simply never had before.”

Chad Vowels
Engineering Manager
