

GETTING STARTED WITH DRIVEWORKS PRO

The Leading Solution for Design Automation

WHAT IS DRIVEWORKS PRO?

REDUCE COSTS AND RESPOND QUICKLY TO SALES INQUIRIES

DriveWorks Professional is your design automation tool that brings everything together. Whether you're **automating CAD, connecting to other business systems (like ERP or CRM), or sharing your projects** with your coworkers, sales team, distributors, or customers; DriveWorks Pro is a great tool for you.

DriveWorks Pro comes in modules. These four software modules make it much easier to build the right solution that suits your company's changing needs. The modules include DriveWorks Administrator, DriveWorks Autopilot, DriveWorks User, and DriveWorks Live.

DRIVEWORKS FACTS

REDUCE REPETITIVE TASKS: With rules-based logic, improve the quality of outputs, automate repetitive design tasks, and reduce costly errors.

INCREASE SALES: Respond to customers quicker than competitors. Win more orders with automatic quote generation.

SAVE TIME & MONEY: Easy to set up configurators with no need for programming skills or consultations.

HOW DOES DRIVEWORKS PRO EXPAND ON SOLO?

With DriveWorks Professional, you unlock that ability to create customer-facing “product configurators”. These are web interfaces in which your customers can pick and choose amongst the options you provide, in order to put together their own custom-configured product.

DriveWorks will produce and deliver the associated documents (such as CAD models and quotes) that you require to efficiently process the order. DriveWorks configurators can include real time 3D previews during the configuration process, and they can operate from data from other locations such as Excel files or SQL databases.

DRIVEWORKS PRO MODULES

DRIVEWORKS ADMINISTRATOR

The Administrator tool is where you set up everything in your projects. This is where you create your forms, set up your models, create reference tables, and develop your project workflow. This is a required step if you want to develop a project.

*Required Module

DRIVEWORKS AUTOPILOT

The best description of DriveWorks Autopilot is that it’s an “engineer in a box.” Essentially, it sits behind the scenes and generates models and documentation. There isn’t any need for manual intervention, and everything happens automatically.

DRIVEWORKS LIVE & USER

These two modules allow you to run your projects, fill out forms, then create requests for models, drawings, BOMs, quotes, and more. With DriveWorks Live, anyone in the world can run your projects since it will post them online for your team, customers, and distributors.

LEARN AND EXPERIENCE WHAT’S POSSIBLE

DRIVEWORKS TECH STACKS

- **GET AN UNDERSTANDING OF HOW DRIVEWORKS CAN WORK FOR SPECIFIC INDUSTRIES**

- The DriveWorks Technology pages (Tech Stacks) go into detail and present examples of all of the features that you can use with DriveWorks Solo.
- **Explore the rules, forms, workflow, integration, 3D, reporting, and automating CAD features for yourself.**

TECH STACKS

HOW CAN THIS GROW?

- **DRIVEWORKS LIVE ALLOWS YOU TO TEST THE CONFIGURATOR TODAY**

- DriveWorks Live offers a live look at DriveWorks Pro.
- **It showcases the capabilities of a live 3D product configurator on your website.** Experience for yourself how your customers could quickly request their quote and configure their product.

WHERE TO START

DriveWorks does not offer a free trial of Professional. The recommended process is to build up to Professional after making use of Xpress and Solo. All the work and training you do there will carry forward without issue, and can be further enhanced after the Professional upgrade. If you'd like to jump to DriveWorks Pro, contact us today!
